The science behind Environ skin care.

Vitamin A is the cornerstone ingredient in the Environ skin care philosophy – an essential skin nutrient that must be replenished daily for skin to appear healthier and more resilient.

The introduction of vitamin A into skin care formulations was a ground-breaking development in skin care. Dr Des Fernandes, rated amongst the top five plastic surgeons in the world, was a pioneer in this field in the 1980s discovering the essential role vitamin A plays in skin health.

He was the first to use vitamin A in high doses to help counteract the harmful effects of the environment, pollution and stress and create the appearance of radiant, visibly improved skin.

Essential Treatments	60 mins	90 mins
(Master Therapist	£83	£116

Environ's pioneering dual electro-sonic technology sets the benchmark for professional skincare treatments. High concentrations of absorbable vitamins A, C & E are driven deep into the skin with low frequency sonophoresis together with pulsed iontophoresis which helps soften lines, reduce pigmentation marks, repair and protect against photo damage and pollution. Within just a few treatments it will have your skin brighter and rejuvenated, helping with any uneven skin tone.

This facial is suitable for all skin types.

Collagen Stimulation Therapy™

Unlocking your Body's Powers of Rejuvenation

Collagen Stimulation Therapy™ (also known as medical needling) has become very popular recently as we have discovered the enormous benefits of this powerful treatment. Dr Des Fernandes assisted with pioneering this technology and has been using it within his plastic surgery practice for many years. It is a cutting edge treatment that stimulates the skin's own ability to produce collagen and assist with the body's natural healing powers. This results driven treatment assists with ageing, sun damage, stretch marks, loose skin, uneven skin tone and dilated capillaries.

Collagen Stimulation Therapy™ is suitable for all skin types and on all parts of the body.

INCREDIBLE RESULTS NATURALLY

Incredible changes to the skin without the need for invasive surgery.

It is a completely natural treatment, using the body's own powers of rejuvenation, rather than using fillers, Botox or other more invasive techniques

The effects of treatment are long lasting. It can take several months for the full extent of new collagen to be formed.
